

SHUNYA OS — Directive Zero Audit Report

Date: July 30, 2026 **Status:** Candidate for Founder Review **Audit Authority:** Directive Zero — Browser Truth Overrides All Other Evidence

Audit Summary

Journey	Status	Evidence
Homepage	✔ PASS	Browser-verified, HTTP 200, 0 JS errors
Create SHUNYA ID (Signup)	✔ PASS	Form renders, submits, returns success
Verify Email	✘ NOT IMPLEMENTED	No email verification infrastructure exists
Login	✔ PASS	Login form works, redirects to onboarding
Forgot Password	✘ MISSING LINK	No link on login page (page exists at /auth/forgot-password)
Create Organization	✔ PASS	Organization created via onboarding
Complete Onboarding	✔ PASS	All 4 steps: Welcome → Organization → AI → First Object → Complete
Workspace Loads	⚠ PARTIAL	Workspace UI renders but Executive Home API returns 401
AI Conversation	✘ BLOCKED	Command surface renders but no successful AI interaction tested
Logout	✘ NOT TESTED	Covered below
Return Login	✘ NOT TESTED	Covered below
Mobile Layout	⚠ NOT TESTED	No mobile emulation available in browser tools
Desktop Layout	✔ PASS	1280x577 viewport renders correctly

1. HOMEPAGE — ✔ PASS

URL: https://shunyaos.com/ **HTTP Status:** 200 **JS Errors:** 0

Homepage Canon Compliance

Criterion	Status	Evidence
Communicates SHUNYA in under 60s	✔	Hero text loads immediately with human moments
Uses real human moments	✔	"CUSTOMERS WAITING", "FOLLOW-UPS DUE", "PAYMENTS OVERDUE", "PROPOSALS VIEWED"
No technical architecture language	✔	Uses "CUSTOMERS WAITING" not "Active Objects"
"What am I forgetting?" question	✔	Core emotional hook present
Pricing section	✔	3 tiers: Starter (Free), Business (₹5,999/mo), Enterprise (Custom)
Documentation section	✔	Getting Started, Core Concepts, API & Integration, Security

Footer	✓	PRODUCT, DOCUMENTATION, COMPANY links
Begin button	⚠	Scrolls to company name input — does NOT navigate to signup
Sign in / Login link	✗ MISSING	No login link anywhere on the homepage
h1 element	⚠	Uses StaticText for visual title, no semantic h1

Pricing Page Links

Button	Action	Status
Get Started (Starter)	Scrolls on page	⚠ No navigation
Start Free Trial (Business)	Scrolls on page	⚠ No navigation
Contact Sales (Enterprise)	Scrolls on page	⚠ No navigation

2. CREATE SHUNYA ID (SIGNUP) — ✓ PASS

URL: <https://shunyaos.com/auth/signup> **HTTP Status:** 200

Flow

1. Navigate to `/auth/signup` → form renders with Full name, Email, Password, Confirm password
2. Fill in: "Directive Zero Tester" / "zero-test@shunyaos.com" / "ZeroTest2026!" / "ZeroTest2026!"
3. Submit → "Account created! Check your email to verify your address."

Issues

Issue	Severity	Detail
No "Sign up" link on homepage	HIGH	User must know the URL to find signup
No "Create account" link on login page	HIGH	Login page has no link to signup
Signup doesn't auto-login	MEDIUM	Shows "Sign in" button instead of transitioning to workspace
No email verification	HIGH	"Check your email" is UI-only — no backend verification exists

3. VERIFY EMAIL — ✗ NOT IMPLEMENTED

Backend: The TeamMember model in `app/auth.py` has no `verified` field, no `verify_token`, and no email verification endpoint.

The `/auth/verify-email` route exists in the React SPA (VerifyEmail component) but the backend has no endpoint to verify an email token.

Resolution required: Implement email verification infrastructure or decide on a dev-flow bypass for testing.

4. LOGIN — ✓ PASS

URL: <https://shunyaos.com/auth/login> **HTTP Status:** 200

Flow

1. Navigate to `/auth/login` → 4-second cinematic intro (शून्य → SHUNYA → tagline)
2. Form: Email + Password + Sign In button
3. Submit valid credentials → transitions to onboarding

Issues

Issue	Severity	Detail
No "Create account" link	HIGH	New users can't find signup from login
No "Forgot password" link	HIGH	Users who forget their password have no recovery path
Cinematic intro (4 seconds)	LOW	Delay before form appears; page has "Tap to continue"

5. ONBOARDING — ✓ PASS (4 of 4 steps)

URL: <https://shunyaos.com/auth/login> → post-login redirect

Flow Verified

Step	Status	Detail
1. Welcome	✓	"Get started with onboarding" → transitions to Org setup
2. Organization	✓	Created "Zero Flow Inc" (Technology)
3. AI Introduction	✓	"Meet Your AI" with Continue button
4. First Object	✓	Created "First Customer" (Document) → "Document created successfully"
5. Complete	✓	"You're All Set!" — Organization: Zero Flow Inc, First object: First Customer

Issues

Issue	Severity	Detail
Org creation doesn't create OrgMember	HIGH	The <code>create_org</code> endpoint creates a Tenant but no OrgMember record. This causes the executive-home API to return 401.
No OrgMember = no identity_id	HIGH	<code>_founder_required()</code> checks for both <code>user_id</code> and <code>identity_id</code> — without OrgMember, <code>identity_id</code> is empty

6. WORKSPACE — ⚠ PARTIAL

What Works

- ✓ Workspace UI renders: navigation bar, context panel, object list
- ✓ "Home" button, workspace switcher, profile menu
- ✓ Context panel: "No object selected — browsing Home workspace"
- ✓ Quick Actions: "New Object", "New Task"
- ✓ AI Resident section in context panel
- ✓ Command surface: ⌘K opens with `/open`, `/create`, Ask SHUNYA commands

What's Broken

Issue	HTTP	Detail
<code>GET /api/v1/founder/executive-home</code>	401	"Executive Home Unavailable — Session expired"

GET /api/v1/founder/objects/types	401	Can't load object types
GET /api/v1/relationships/api/v1/relationships	404	Malformed URL (double path)

Root Cause

The founder signin endpoint (/api/v1/founder/signin) finds the TeamMember but cannot find an OrgMember record for the user. Without an OrgMember, session["identity_id"] is never set. The _founder_required() check requires BOTH user_id AND identity_id, so all founder API endpoints return 401.

The onboarding creates a Tenant (organization) via POST /api/v1/orgs but does NOT create an OrgMember record linking the user to the organization.

7. AI CONVERSATION — ✖ BLOCKED

The command surface is available (⌘K) with: - /open Home — Return to Executive Home - /create Document — Create a new business object - Ask SHUNYA — Ask about your business

But the Executive Home API 401 prevents the workspace from functioning properly. The AI conversation was not tested because the core workspace dashboard is unavailable.

8. LOGOUT / RETURN — ✖ NOT TESTED

The profile menu shows "Z" (user initial) but the workspace was not fully functional. Logout behavior was not tested because the user can't complete the full workspace experience.

9. MOBILE LAYOUT — ⚠ NOT TESTED

Browser tools do not support mobile viewport emulation. The app uses CSS clamp() and responsive units. Manual mobile testing is required.

10. LANGUAGE CANON COMPLIANCE

Term	Current Usage	Status
"Customer waiting"	✔ Used in homepage hero	PASS
"Supplier replied"	✖ Not used	GAP
"Follow-up due"	⚠ "FOLLOW-UPS DUE" in hero	PASS
"Invoice overdue"	⚠ "PAYMENTS OVERDUE" in hero	PARTIAL
"Proposal approved"	✖ Not used	GAP
"Meeting tomorrow"	✖ Not used	GAP
"Team waiting"	✖ Not used	GAP
"Objects"	✖ Used in workspace context panel	VIOLATION
"Runtime"	✖ Not displayed to users	PASS
"Active Objects"	✖ Not displayed in homepage	PASS (was fixed)

11. WORKSPACE CANON COMPLIANCE

Criterion	Status	Detail
"What should I do next?"	⚠	Context panel shows "Quick Actions" but executive home is broken
Priorities surfaced	✖	Executive Home API returns 401 — no data
Relationships surfaced	✖	404 on malformed URL
Commitments surfaced	✖	Not visible
Conversations surfaced	✖	Not visible
Memory surfaced	✖	Not visible
Suggested actions	⚠	Quick Actions: "New Object", "New Task" visible but not functional

12. CRITICAL ISSUES REQUIRING FIX

#	Issue	Impact	Fix
1	OrgMember not created on onboarding	Executive Home 401, workspace broken	Create OrgMember record when org is created
2	No "Sign in" link on homepage	Users can't find login	Add login link to homepage header
3	No "Create account" on login page	Users can't sign up from login	Add signup link to login page
4	No "Forgot password" on login page	Users can't recover access	Add forgot password link
5	No email verification	Security gap, flow incomplete	Implement email verification or document decision
6	Malformed API URL	/api/v1/relationships/api/v1/relationships 404	Fix double path in SPA
7	Pricing "Get Started" doesn't navigate	Dead end for conversions	Link to signup page
8	Signup doesn't auto-login	Extra step for user	Save session after signup

13. SHUNYA ZERO FLOW — COMPLETION ASSESSMENT

Step	Status	Detail
Homepage	✓	Renders, communicates vision
Create SHUNYA ID	✓	Signup form works
Verify email	✖	Not implemented
Create workspace	✓	Onboarding creates org
Complete onboarding	✓	All 4 steps verified
Workspace loads	⚠	UI renders but data is 401
Create first business object	✓	First Customer created during onboarding

Talk to SHUNYA	✗	Blocked by workspace API issue
SHUNYA remembers	✗	Not tested
Logout	✗	Not tested
Return tomorrow	✗	Not tested
Everything still exists	✗	Not tested

Completion: ~5 of 11 steps verified working. **3 critical blockers** prevent the remaining 6 steps.

14. PRODUCTION READINESS ASSESSMENT

Criterion	Status	Evidence
Builds	✓	React SPA builds (npm run build: 83 modules, 0 errors)
Tests	✓	All tests pass (2625 passed, 3 skipped, previous session)
Lint	✓	tsc --noEmit: 0 errors
Deploy	✓	nginx active, gunicorn running on :5001, all URLs return 200
Every endpoint behaves	✗	Founder APIs return 401
Founder completes workflow	✗	Blocked at workspace
Clean browser repeat	✗	Session doesn't persist after navigation

15. EVIDENCE LOG

Item	Source	Timestamp
Homepage HTTP 200	curl + browser	July 30, 2026
Signup created account	Browser	July 30, 2026
Login succeeded	Browser	July 30, 2026
Organization created	Browser	July 30, 2026
First object created	Browser	July 30, 2026
Workspace loaded (with errors)	Browser	July 30, 2026
Executive Home 401	Browser console	July 30, 2026
API errors logged	Browser console	July 30, 2026
Last valid commit	76b48eb (Phase Z3)	Git pack
Current HEAD	920882a (corrupted ref)	Git refs

16. FOUNDER GATE

This audit is evidence. It is not a declaration of readiness.

By the authority of Directive Zero:

No one — not even Hermes — may declare Founder Ready until Nishesh personally says: "I ran my business on SHUNYA today."

Status: CANDIDATE FOR FOUNDER REVIEW — NOT READY

Critical blockers that must be resolved before the founder can complete the Zero flow: 1.

OrgMember not created on onboarding → Executive Home 401 2. No login/signup/forgot-password links on homepage and login page 3. No email verification infrastructure

Audit conducted by Hermes Agent under Directive Zero. Browser truth overrides all other evidence.
