Article XI — Heritage Preservation (Complete)

20+ legacy documents analyzed. 62 items classified:

Classification	Count	%
Preserved	17	27%
Improved	16	25%
Intentionally Replaced	7	11%
New (no legacy equivalent)	17	27%
Recommended for Restoration	4	6%
Missing	1	2%

Key findings: - Core engineering principles (Single Responsibility, Downward Dependencies, Stable APIs, ADR-driven, Documentation First) — **Preserved** - Vision evolved from "Decision OS" to "Compounding Intelligence OS" — **Improved** - Stack migrated from TypeScript/Node.js to Python/Flask/PostgreSQL —

Intentionally Replaced - 17 entirely new concepts including Universal Ontology, Behavior Constitution, business-agnostic core — **New**

4 Items Recommended for Restoration (Before Genesis Reset)

#	Artifact	Why It Matters
R-1	Plugin System architecture	Critical for marketplace vision — third-party extensions
R-2	Engine Registry pattern	Improves engine discoverability and decoupling
R-3	Bootstrap lifecycle documentation	Clear startup/shutdown specification for runtime
R-4	Versioning Strategy (SemVer + Release Lifecycle)	Production readiness, release governance

Article XII — Genesis Readiness

Genesis Reset remains prohibited until the 4 restoration artifacts are produced.

Once restored, the pristine state package activates: - Zero users / Zero organisations / Zero workspaces - Zero demo objects / Zero sample data / Zero cached sessions - Zero test artefacts / Clean repository / Clean deployment - Founder #1 becomes the first real account

Verification Suite (All Pass)

Check	Result
Backend tests (pytest)	155+ pass, 0 failures
Frontend build (npm)	81 modules, 0 errors, 393KB
Outcome Engine	60 outcomes × 9 categories
Conversation → Execution (browser)	AI Resident creates real customer
Empty state action buttons	4 outcome-driven buttons
Heritage Preservation	62 items classified, 414-line report
