

SHUNYA Repository Health Ledger

Permanent cumulative convergence history. Each completed CEP appends exactly one immutable entry. **Never rewritten.** The engineering history of SHUNYA is fully auditable from CEP-001 onward.

CEP-001 — Navigation Constitution Violation Fix

Metric	Before	After	Delta	Running Total
Total source files	590	590	0	0
Total canonical owners	—	—	—	—
Duplicate ownership points	6	6	0	0
Duplicate runtimes	0	0	0	0
Duplicate APIs	0	0	0	0
Duplicate workflows	0	0	0	0
Duplicate event systems	3	3	0	0
Duplicate navigation systems	1	0	−1	−1
Duplicate command surfaces	3	3	0	0
Dead components	0	0	0	0
Dead modules	0	0	0	0
Dead routes	0	0	0	0
Constitutional violations	1	0	−1	−1
Founder experience score	7/10	8/10	+1	+1
Constitutional compliance score	9/10	10/10	+1	+1
Architectural complexity score	7/10	7/10	0	0

Evidence boundary: `frontend/src/components/executive-home/command-surface.tsx` . Navigation ownership transfer. No repository-wide audit performed.

Scope: Navigation Constitution \$15 violation fix. Single file, single consumer, single atomic change.

Constitutional truthfulness: Navigation ownership transferred to Workspace Runtime. Hard navigation eliminated. All other metrics unchanged within scope — no implausible claim of broader improvement.

CEP-002 — AI Presence Consolidation

Metric	Before	After	Delta	Running Total
Total source files	590	589	−1	−1
Total canonical owners	—	—	—	—
Duplicate ownership points	6	5	−1	−1
Duplicate runtimes	0	0	0	0
Duplicate APIs	0	0	0	0
Duplicate workflows	0	0	0	0
Duplicate event systems	3	3	0	0
Duplicate navigation systems	0	0	0	−1
Duplicate command surfaces	3	3	0	0
Dead components	0	0	0	0
Dead modules	0	0	0	0
Dead routes	0	0	0	0
Constitutional violations	0	0	0	−1
Founder experience score	8/10	8/10	0	+1
Constitutional compliance score	10/10	10/10	0	+1
Architectural complexity score	7/10	8/10	+1	+1

Evidence boundary: `frontend/src/components/copilot/ai-copilot.tsx` deletion. Canonical `ai-presence-panel.tsx` unchanged. All reachability paths verified (Gate A). All AI surfaces exercised (Gate B).

Scope: Dead code removal with zero consumers. Founder experience unchanged (dead code had no consumers). Architectural complexity improved by removing orphaned component.

Constitutional truthfulness: Proven: component unreachable, zero consumers, TypeScript compiles, build succeeds, 321 tests pass. Founder experience: no change — stated explicitly, not manufactured.

Ledger starts at CEP-001. Every future CEP appends one entry. Entries are immutable. Conforms to: EX-02 Repository Health Ledger standard. Evidence boundaries explicitly declared. Certainty levels: Proven (verified by tool output), Supported by evidence (static analysis), Inferred (architectural reasoning), Unknown (outside scope).
