

WVR-001A — Wave Verification Addendum

Closure Decision: use-reality.ts Dead Code Confirmation

Date: 2026-08-05 **Status:** Closure artifact — Wave 1 constitutionally complete after deletion

1. Repository Evidence

Evidence	Result	Method
Import count	0	<code>grep -r "from.*use-reality" frontend/src</code> — zero results
Function call count	0	<code>grep -r "useReality" frontend/src</code> — 0 results outside own file
Reachable from canonical Living Workspace	No	<code>living-workspace/living-workspace.tsx</code> does not import or reference <code>useReality</code>
Runtime consumers	None	Confirmed dead — no execution path reaches this hook

2. Reclassification

Previous finding (WVR-001): Wave 1 blocker — `use-reality.ts` retains 15s Continuous Reality polling loop.

Revised finding: Dead Code Cleanup — `use-reality.ts` has zero consumers. Its 15s polling loop was never reaching any component. No migration needed because no component depends on it.

3. Action

- Deleted:** `frontend/src/components/living-workspace/use-reality.ts`
- Files remaining:** 186 (was 187)
- Net repository delta (wave):** -5 files (4 removed CEP-003-005, +1 added CEP-006, -1 dead code cleanup)

4. Verification

- ✓ File deletion confirmed: `test -f` returns false
- ✓ No remaining imports: `grep` for `useReality` in `frontend/src` returns 0
- ✓ TS compile: `tsc --noEmit` exit 0
- ✓ Vite build: exit 0

5. Wave 1 Declaration

All conditions for Wave 1 constitutional completeness are satisfied:

Condition	Status
CEP-002 (AI Presence)	✓ Complete
CEP-003 (Event Bus)	✓ Complete
CEP-004 (Command Surface)	✓ Complete
CEP-005 (Notification Toast)	✓ Complete
CEP-006 (SSE Continuous Reality)	✓ Complete
WVR-001 (Independent Verification)	✓ Complete
Use-reality.ts dead code resolved	✓ Complete
Repository Health Ledger updated	✓ Complete

Wave 1 is constitutionally complete.
